PROFILE

Khonif (23), a fresh graduate in Informatics from Universitas Amikom Purwokerto with hands-on experience in developing web, mobile, software, and game applications through academic and personal projects. Familiar with JavaScript, TypeScript, React.js, Next.js, Laravel, Flutter, SQL, and Git/GitHub, with additional experience in C# and Unity Engine. Strong problem-solving, analytical thinking, and teamwork skills, with a keen interest in software and game development. Eager to apply technical knowledge, learn new technologies, and contribute to professional development teams.

EDUCATION

Universitas Amikom Purwokerto - Banyumas, Central Java **2022 - 2026**

- **Informatics | GPA: 3.78/4.00 | Cumlaude**
- **Courses:** Web Programming, Mobile Programming, Mobile Game Programming, Database Systems, Software Engineering, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Natural Language Processing, 2D & 3D Animation.
- **Thesis:** Implementation of the Game Development Life Cycle (GDLC) Method in Developing an Educational Game for Introducing Computer Devices Using Unity Engine

SMK Ma'arif NU 1 Paguyangan - Brebes, Central Java **2019 - 2022**

- Computer and Network Engineering

ORGANIZATIONAL EXPERIENCE

Information Technology Research And Multimedia (INMED) - Programming Division **2023**

- Developed competencies in programming and software engineering through learning activities and practical projects within the Programming Division.
- Studied the implementation of programming concepts in web, desktop, and mobile application development.
- Participated in collaborative project development through software design, implementation, testing, and evaluation processes.
- Collaborated with division members through technical discussions, project development, and knowledge sharing related to programming technologies.

PROJECT EXPERIENCE

TechDrop - Educational Game Development for Computer Hardware **2026**

- Designed and developed a desktop-based educational game using Unity Engine by implementing the Game Development Life Cycle (GDLC), interactive computer hardware learning materials, assembly simulation, game-based exercises, and Black Box and Beta Testing, achieving 85% expert evaluation and 90.6% user evaluation.

News5 - Laravel-Based News Portal **2025**

- Developed a web-based news portal using Laravel with CRUD functionality, role-based access control for editors and journalists, article publication workflows, data validation, and interactive comments and replies using Livewire.

Capit Store - Next.js-Based E-Commerce Application **2025**

- Developed a web-based e-commerce application using Next.js with user authentication, role-based access, product and inventory management, MongoDB integration, shopping cart, order processing, address management, and automatic stock updates.

Petualangan Si Tupat - 3D Animation Production **2025**

- Contributed as Producer, Rigging Artist, and Rendering Artist in the production of a 3D animation, performing character rigging and rendering while utilizing Autodesk 3ds Max, Mixamo, Adobe After Effects, Adobe Media Encoder, and Adobe Photoshop throughout the production and post-production processes.

JBAG - Mobile Game Account Marketplace Application **2024**

- Designed and developed JBAG, a mobile application for game account trading using Flutter and Dart, including functional implementation, testing, and source code management with Git and GitHub.

ParkEazy - Desktop Parking Management Application **2024**

- Developed a desktop-based parking management application using C#/.NET Framework with SQL Server integration, implementing CRUD operations, user authentication, vehicle and parking space management, reservations, and parking status updates.

“Pozard” Character Intellectual Property (IP) Development **2024**

- Developed the “Pozard” character IP by creating its character profile, background story, synopsis, and visual identity, supported by SWOT analysis, IP strategy, and market segmentation to identify opportunities for cross-media development.

CERTIFICATIONS

Desktop Office Training (DOT) - Applied Microsoft Office **2025**

English Certification Program - Amikom Purwokerto University **2025**

Certificate in Artificial Intelligence Associate (CAIA) - Logical Operations **2025**

SKILLS

- **Language:** Bahasa Indonesia (Native), English (Intermediate)
- **Hard Skill:** HTML, CSS, JavaScript, TypeScript, Git, GitHub, React.js, Next.js, Node.js, SQL, REST API, Laravel, C#, Unity Engine, Flutter, Microsoft Office (Word, Excel, Powerpoint), Adobe (Photoshop, Illustrator, After Effects), CorelDRAW, Autodesk 3ds Max, and Google Workspace (Sheets, Docs, Slide).
- **Soft Skill:** Analytical Thinking, Critical Thinking, Problem Solving, AI Literacy, Adaptability, Continuous Learning, Teamwork, Communication, Time Management, Attention to Detail.
